

Course Code: 1W730GW

Course Title: IBM Integrated Analytics System (IIAS) for Administrators V1.0

Description:

This course provides participants with advanced administration skills for IBM Integrated Analytics System. This course is designed to give participants an overview of the IIAS system, show how to administer the system using the console and command line interface, and extend the appliance. Participants will also monitor the system and performance in addition to managing users and security.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the Self-Paced Virtual Classes and Web-Based Training Classes on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course. <http://www.ibm.com/training/terms>

Objectives:

- IIAS Architecture and Ecosystem
- IIAS Console
- Appliance Security
- Db2 Warehouse Administration and Security (including Users and Privileges)
- System and Workload Monitoring
- Alert and Call Home
- Extending the Appliance

Prerequisites:

- A working knowledge of UNIX or Linux
- Experience with shell scripting
