Course Title: InfoSere MDM Workbench V11

Description:

This course is designed for anyone who wants to get an understanding of how to use and customize the InfoSere Master Data Management using the InfoSere MDM Workbench. This course takes a you through the process customizing both the Virtual and yysical MDM using the InfoSere MDM Workbench. The focus of the course is on the core features of the Workbench: Creating a yysical MDM Addition, creating a yysical MDM Extension, creating a yysical MDM Behavior Extension, creating a composite service, deploying a Virtual MDM configuration, configuring the Virtual Data Model, creating a Virtual custom Composite View, creating a Virtual Callout Handler, generating an enterprise service interface using the Virtual data model and customizing a Hybrid implementation. For each core area, the instructor will explain the high-level concepts, have them work with the feature and then demo and review the feature details. Heavy emasis is put on exercises and activities, allowing them to apply the knowledge that they learn in the classroom, after course conclusion.

If you are enrolling in a Self Paced Virtual Classroom or Web Based Training course, before you enroll, please review the **Self-Paced Virtual Classes and Web-Based Training Classes** on our Terms and Conditions page, as well as the system requirements, to ensure that your system meets the minimum requirements for this course.

<http://www.ibm.com/training/terms>

Objectives:

- Understand the MDM Architecture and how the yysical, Virtual and Hybrid MDM handles a service request
- Understand the core Workbench features available for the InfoSere MDM
- Understand how MDM using OSGi for deploying customizations to the product
- Create a new yysical MDM Entity using the Workbench Wizard
- Extend an existing yysical MDM Entity using the Workbench Wizard
- Extend an existing yysical MDM Service using the Workbench Wizard
- Create a new Composite Service using a transiant object containing other existing business objects
- Customize and deploy a Virtual configuration
- Create a new Virtual Callout Handler
- Create a new Virtual Composite View
- Generate new Services based on the Virtual configuration (eSOA)
- Customize a Hybrid MDM implementation
- Understand the Adaptive Service Interface (ASI)

Prerequisites:

You should have attended:

- Data Model and Service Mapping for the InfoSere MDM Advanced Edition V10 (ZZ610)

It is also recommended that you have working knowledge of Java development and XML concepts as it will be used during the exercises.

Duration:

24 Hrs

Topics:

Introduction

InfoSere MDM Architecture

- Virtual, physical and Hybrid MDM
- Request/Response Framework
- Core physical MDM
- Core Virtual MDM

OSGi and MDM

physical MDM Data Additions

- Additions Architecture
- Creating an MDM Module Project
- Creating an Addition
- Core Property Files
- Custom Code Tables

physical MDM Data Extensions

- Extensions Architecture
- Creating an Extension

physical MDM Behavior Extensions

- Behavior Extensions Architecture
- Creating an Behavior Extension

Composite Services

- XML Composite Services
- Java (Business Proxy) Composite Services

Adaptive Service Interface (ASI)

- How ASI fits into the InfoSere MDM Architecture
- How to build an new Service Mapping
- How to tailor service for your organization

Virtual Data Model

- Virtual data model
- Creating a new MDM Virtual Attribute Type
- Deploying the Virtual Configuration

Virtual Handlers

- Callout Handlers
- Event Handlers
- Composite View Handlers

eSOA Toolkit

- Understand the eSOA Toolkit
- Generate java and WebService client

Hybrid MDM

- Hybrid MDM assets
- Hybrid MDM service flow
- Hybrid MDM Customizations

AGENDA:

Day 1

- Unit 1: InfoSere MDM Architecture
- Unit 2: OSGi and MDM

ysical MDM

- Unit 3: Data Additions
 - Exercise 1: Additions
- Unit 4: ytical Data Extensions
 - Exercise 2: Extensions – New Person Attribute

Day 2

- Unit 5: MDM ytical Behavior Extensions
 - Exercise 3: Behavior Extension
- Unit 6: Composite Services
 - Exercise 4: Composite Services
- Unit 7: Adaptive Services Interface (ASI)

Virtual MDM

- Unit 8: Virtual Data Model
 - Exercise 5: Creating a Custom Attribute Type

Day 3

- Unit 9: Virtual Handlers
 - Exercise 6: Callout Handler
 - Exercise 7: Custom Composite View
- Unit 10: eSOA Toolkit
 - Exercise 8: eSOAToolkig
- Unit 11: Hybrid MDM
 - Exercise 9: Hybrid Customization

Audience:

This advanced course is for Infrastructure Specialist, Senior Technical Specialist, Technical Specialist, Support Engineers, System Architects.
