

Course Code: CV844G

Course Title: Db2 12 for z/OS Basic Database Administration

Description:

This course will expose the beginning z/OS DBAs (Database Administrators) to fundamentals of Database Administration for a Db2 12 for z/OS. This course will teach the students how to physically implement a logical database design using DDL, and teaches considerations of referentially related tables. This course discusses the use of basic utilities, program preparation, serialization, and basic database security. This course does not cover distributed data processing, nor does it cover data sharing.

Objectives:

Please refer to course overview

Prerequisites:

- Familiarity with the z/OS operating system, including TSO, ISPF, and SDSF
- Familiarity with SQL data manipulation statements (SELECT, INSERT, UPDATE, and DELETE) to access and change the contents of Db2 tables

Duration:

24 Hrs

Topics:

Preface• Course Overview• Intended Audience• Course Objectives• Prerequisites
 Unit 1 - Db2 Relational database concepts• Relational Database design• Data access• Interacting with Db2• Catalog and directory
 Unit 2 - SQL and SPUFI• SQL SELECT statement review• SQL INSERT, UPDATE, DELETE review• SQL COMMIT and ROLLBACK review• Joining tables• Executing SQL using SPUFI
 Unit 3 - Db2 objects (Storage groups, databases, and table spaces)• Object concepts• Storage Groups• Databases• Table Spaces
 Unit 4 - Db2 Objects (Tables, indexes, and views)• Tables o Aliases• Table constraints o Primary key o Foreign key o Check o Referential integrity• Indexes• Views• Qualified names• Implicit object creation
 Unit 5 - Utilities• Utility Categories• Load Utility• Check Data Utility• Unload Utility• Runstats Utility• Reorg Utility
 Unit 6 - Commands and program preparation• Db2 Command Structure• Display Command• Archiving Logs• Stop and Start Commands• Executing Commands• Program Preparation
 Unit 7 - The Db2 system• System Parameters (zParms)• Address Spaces• System Databases• Buffer Pools• Logging• Integrity• Security
 Unit 8 - Db2 Shutdown, startup, and recovery• Start and Stop Commands• Db2 Shutdown Process• Db2 Startup ases• System Recovery• Object Recovery• Copy Utility• Recover Utility
 Appendix A - Demonstration solutions

Audience:

- Students who will be performing the role of Db2 for z/OS database administrators who need to acquire the basic skills required to administer a Db2 database.
