

Course Code: MAX4339GS

Course Title: Implementing Monitor in Maximo Application Suite

Description:

In this course, you will be introduced to the concepts of Maximo Monitor, how to set up devices and dashboards, and how to work with prioritizing alerts and automated Anomaly detection. You will also learn about condition monitoring for intelligent asset management, extending and integrating Monitor with the third party IoT platforms, and Edge Data collector.

Objectives:

After completing this course, you should be able to:

- Explain the key benefits and processing options in Monitor.
- Describe the architecture and the process in Monitor.
- Identify device types and set up device.
- Work with prioritizing alerts in Monitor.
- Work with Automated Anomaly detection.
- Setting up and configuring dashboards in Monitor.
- Explain Condition Monitoring for intelligent Asset Management in Monitor.
- Discuss integration and extending Monitor functions with third party IoT platforms.
- Describe Edge Data Collector in Monitor.

Duration:

6.4 Hrs

Topics:

- Start here
- Learn about basic concepts of Maximo Monitor
- Learn about devices, dashboards, and alerts
- Learn about condition monitoring
- Learn about Monitor integration
- Practice what you have learned
- Earn the badge
- Get your course certificate
- Complete the course survey

Audience:

Implementation Consultants, Administrators, Technical Sales, System Users
