Course Code: MAX4341GS

Course Title: Short-term Planning with Maximo Scheduler

Description:

In this course, you will learn how to perform short term planning using core Maximo Graical Scheduler applications. You'll learn how to prepare your data for scheduling activities using Scheduler Data Manager and how to manage and modify your resource availability using Graical Resource View. You will also learn how to use the Graical Work Week application to schedule and assign work while you manage resources over a short period of time. This course includes hands-on labs walking you through the creation of base scheduling data, validating that data using Scheduler Data Manager as well, and modifying your resource availability and assigning work.

Objectives:

After completing this course, you should be able to:

- Discuss the usage of Maximo Scheduler applications
- Prepare Calendar and Work Data for scheduling.
- Validate scheduling data using Scheduler Data Manager.
- Perform resource availability modifications using the Graical Resource View application.
- Manage resource availability using the Graical Work Week application.
- Manage labor and crew assignments using the Graical Work Week application.
- Configure new availability reason codes in the Domains application.
