Course Title: IBM Blueworks Live Account Administration

Description:

In this course, you learn how to administer Blueworks Live, manage accounts, and use enhanced product features. The course is designed for advanced business users who have experience in creating, analyzing, and documenting business processes with Blueworks Live.

The first section of the course, 'Managing users and user access,' teaches you how to manage users and account spaces. The second section, 'Account management,' covers how to customize accounts, how to manage the glossary, and other account management needs. In the third section, 'Blueworks Live enhancements,' you learn how to capture policies and conduct playbacks in Blueworks Live.

Lab exercises throughout the course reinforce the concepts that you learn and allow you to practice managing Blueworks Live. These exercises require an established Blueworks Live account, which your organization must provide for you.
